

AE1004 – Northeastern part of basin

Well AE1004 “FO'ARA EXP” in the northeastern part of the basin has a relatively flat EC trend of $-1.06 \mu\text{S}/\text{cm}/\text{yr}$, with an R^2 of 0.00. The low R^2 reflects the high variability in the data. There are also periods with few samples. For example, only two data values occur between 1998 and 2005.
